

## Utility Bar

UBR

**NEW!**

Multi purpose utility bar engineered for maximum torque in prying and pulling out nails

High strength single piece forged construction with high load bearing capacity without bending

Induction hardened ends 35-42HRC

Extra wide, half round blade for increased strength without increasing weight

Powder coated for increased resistance to corrosion

Three nail slots, one at each end and one in the middle for pulling out all types of nails at any angle

Thin and sharp chiselled end slides easily into cracks and crevices

Perfect for window and door trim, moulding and baseboard works
